

Monkfield Medical Practice

Monkfield Medical Practice (MMP) is a friendly, modern, forward thinking GP surgery providing sustainable healthcare to Cambourne. We have a cohesive multi-disciplinary team. We are committed to delivering high quality care for our patients and the professional development of the whole team. We have a purpose built Practice, central to the community. We serve a young population with a low home visiting rate.

We have 11,800 patients currently, with a predicted growth of a further 7500 patients due to the continued development of Cambourne.

The Practice has recently invested in the implementation of DoctorLink, a new online service where you can access advice and appointments online. We have upgraded our website to make this more accessible and user-friendly. Alongside this we have also invested in MJOG, a piece of software that allows two-way interactive communication to our patients and also codes responses back into the clinic system.

The clinical roles are well supported through an accessible, friendly multi-disciplinary team and assisted with a dedicated administration team. We have weekly practice meeting for all clinicians and quarterly whole team meetings. We use SystemOne (TPP), have onsite PRISM, midwifery, health visitors, physiotherapy, podiatry, SALT and smoking cessation.

We hold regular Clinical meetings and support the duty doctor role through having a clearly defined role, on the day prescription buddies, dedicated administration time, regular breaks and managed appointment times.

As a result of our continued growth in population we are always looking to expand our team with individual offering a variety of skills and specialist interests.

If you would like an informal chat or visit to the Practice, please contact Hannah Crisford, Practice Manager [h.crisford@nhs.net](mailto:h.crisford@nhs.net) Or 01945 282 460.
